Projects

Chat App

A web app for chatting. Link: <https://shivam-chat-app-1.herokuapp.com/>

- Users can chat with each other by making rooms.
- Anyone could make a room and others can join it to chat with each other

Movie review web app

A web app by which users can review various movies, series and documentaries and thus help others to find good content.

Link: <https://github.com/ShivamYadav-Coding/five-star-review>

- Full User authentication has been implemented with email confirmations and forget password.
- Two roles i.e. 'user' & 'administrator' are implement. If you login with an email id that is set as administrator in database then you will get different UI compared to UI you get when you login otherwise. (Whenever a new user signup then by default it is set as user).

Elinks

A web app to save your bookmarks. Link: <https://elinks-project.herokuapp.com/>

- Provides easy access to all your bookmarks from anywhere.
- Full User authentication has been implemented with email confirmations and forget password.
